

Customization of Tongs and stainless steel products

Dear customer,

Starting from 100 units, create your personalized clip by laser engraving your logo or signature. Choose option A or B to position the logo.

Depending on the color of its clamp we can engrave in laser with light or dark tonality.

We can engrave on one or both sides. There is also the possibility of lacquering the clips with corporate colors and distributing them as a promotional product from 500 units.

DESIGN REQUIREMENTS

Although we can customize the clips with almost any type of design, the maximum space the design can occupy is 3 x 1 cm. Send us your proposal and we will provide you with a rendering of how it would look.

The files, as far as possible, should be Vector (Illustrator, ID, Vector PDF or other design files).

Other formats, such as Bitmaps, should be at least 300dpi resolution.

ACCEPTANCE OF WORK

In the case of having made any modification in the design, and to avoid any type of error or confusion, you must send us an e-mail with the order confirmation, the final design file attached and the description of the chosen size. We will then start the production process.

PRODUCTION LEAD TIME

Once the design is approved, the production time is 15 working days.

Lacquered in colors and special works and packagings. Consult stock.

Consult all our models of tongs in our web page.
