

If you're a daily consumer of premium ice, you're well aware of its price and average consumption. With **alinia**, you can recoup your investment in the A1 machine in less than a year and the A2 in just 6 months. Moreover, you can offer your customers a personalized and unique product at a price significantly below other options.

If you don't need to remove the ice from the mold, **alinia** will keep your ice at the perfect temperature, frost-free, and completely shiny, dispensing each ice cube at the moment you need it with very low consumption.

Welcome to the exclusive world of **alinia** Premium Clear Ice Maker, the machine that redefines drink service in elite bars, cocktail lounges, restaurants, and hotels.

Designed to produce ice in large quantities effortlessly and without the need for carving.

**"The ultimate choice
of the best bartenders"**

alinia produces batches of crystalline and purified ice in various molded formats. The system is simple and fully automatic; just fill the tray with the chosen molds, close the door, and press the "ICE" button.

In 24 hours, you can enjoy spherical ice in two diameters, diamonds, Collins bars, or large-format cubes.

Longer-lasting: the ice doesn't start melting until after 5 hours, enhancing the flavor of your drinks.

More refreshing: the temperature at the center of the ice can reach -20°C.

How does **alinia** work?

Thanks to directional freezing, **alinia** creates the clearest ice in the shape you choose
no need for cutting or carving!
Without defects or bubbles.

Its system allows for ice production with extremely low water and energy consumption.

If you need special-shaped or sized cubes, feel free to request a quote and assistance for the production of custom molds.
